# Compability

- Optane SSD support. For modle 20RY.
- macOS 11.6 tested. However macOS 13 may work.
- Intel bluetooth and wlan. The airplay will display but it does not work.
- Hand Off is suppoorted.
- Light sensor OK.
- Camera OK.
- tracepad OK.
- Sleep function ok.

# How to use?

1. Clone this repo.
2. Modify SMBIOS info.
3. Compile `BlockOptane.dsl` if you are using optane.

# Information for Optane

Please refer to this PR #388
